

For Immediate Release

Saint Thomas Health Services Adds Three Specimen Radiography Systems

WHEELING, Illinois (March 25, 2008) – Faxitron X-Ray LLC today announced that it has completed a three system order for Saint Thomas Health Services. The Tennessee-based health care system ordered DX-50 digital specimen radiography units for the stereotactic biopsy suites in the Centers for Breast Health at their Saint Thomas and Baptist Hospitals in Nashville and Middle Tennessee Medical Center in Murfreesboro. This is the second Faxitron specimen radiography system for Saint Thomas Hospital and the third for Baptist.

The compact size of the DX-50 allows it to be placed directly at the point of care in the stereotactic biopsy suite. Breast physicians and radiologists are able to instantly acquire high resolution digital images of core specimens without leaving the suite or repositioning the patient, reducing the overall biopsy procedure time and improving patient care.

About Faxitron X-Ray LLC

Faxitron X-Ray LLC is the global leader in cabinet x-ray systems for specimen radiography, research, and NDT applications. With an installed base of over 5,000 systems in medical facilities and scientific and industrial laboratories around the world, Faxitron is the industry standard in cabinet x-ray.
