

# KliniTray™

## Surgical Specimen Grid

### KliniTray™ from Faxitron®

Determine tumor sites with millimeter precision with KliniTray, a sterile surgical specimen grid that allows surgeons and pathologists to easily locate and pinpoint the exact location of microcalcifications.

### KliniTray FEATURES

#### Accurate Topographic Positioning

Pre-attached 'superior,' 'inferior,' 'lateral' and 'medial' topographic markers and 'L' and 'R' markers allow the specimen to be indicated as it was in the patient's body.

#### Precise Views

KliniTray enables true and precise orthogonal views during specimen imaging with its orientation and specific topographic design.

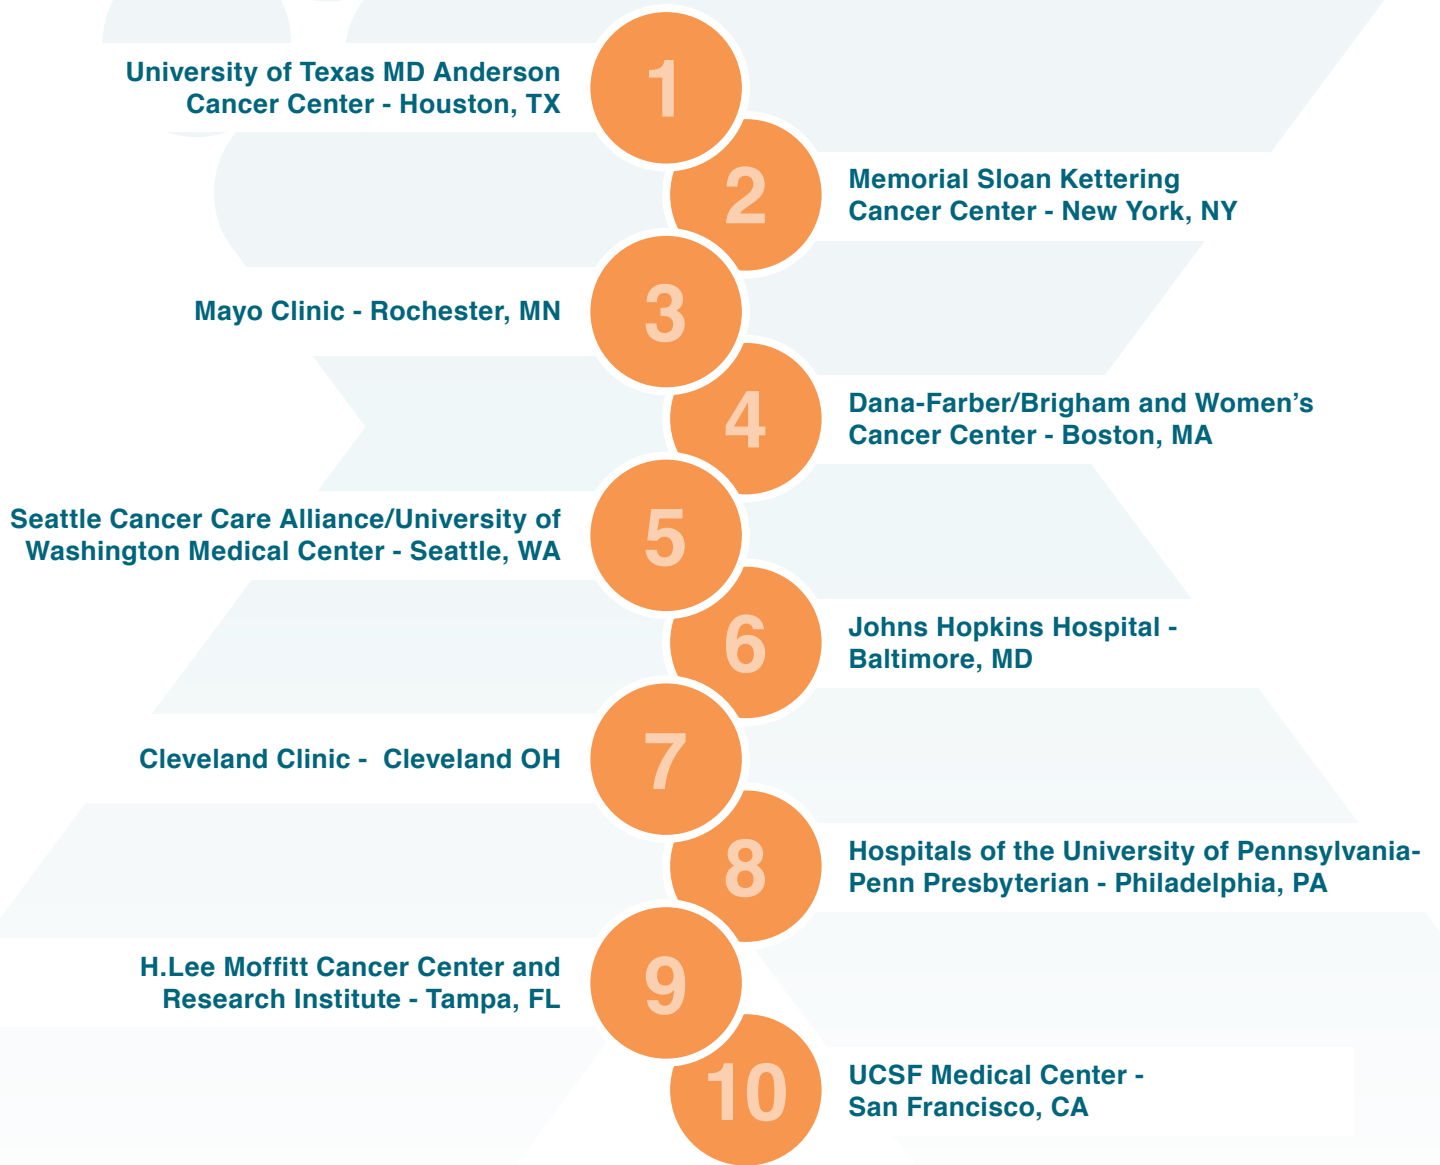

#### Secure Stabilization

The air and water-tight container secures the specimen during preparation, examination and transportation. Specially designed safety pins also stabilize the specimen in an upright position.

*Easily secure and orient specimens with KliniTray.*

## All Top 10 US Cancer Centers Have Multiple Faxitron Systems
